Year 2 Semester 1

2026

Assignment - Part 02 - Marking Schema

Criteria	Weight	Excellent	Good	Satisfactory	Poor	Very Poor
EER → Relational Schema Mapping	10 marks	9–10 – All entities, PKs, FKs, constraints correctly mapped. ISA handled precisely with clear justification.	7–8 – Mostly correct mappings with minor issues. Constraints are mostly accurate.	5–6 – Basic mappings done with some missing PK/FK or ISA refinements.	3–4 – Significant issues with mapping. Major PK/FK or ISA errors.	0–2 – Very minimal or incorrect attempt with little evidence of understanding.
SQL DDL Implementatio n	20 marks	18–20 – Fully correct DDL with all constraints, accurate data types, consistent schema.	15–17 – Minor syntax errors, most constraints implemented correctly.	11–14 – Some missing constraints or mismatches between schema and DDL.	6–10 – Major issues in DDL structure or constraints.	0–5 – Very poor or incomplete implementatio n, schema not reflected.
Insert Sample Data	10 marks	9–10 – All tables populated with valid, consistent data. Clear screenshots provided.	7–8 – Data is mostly valid with minor constraint issues or	5–6 – Data inserted but lacks completeness or variety.	3–4 – Incomplete or mostly invalid data, significant	0–2 – No valid data inserted or screenshots missing.

			screenshot omissions.		constraint violations.	
SQL Queries & Outputs	20 marks	18–20 – All queries are correct, optimized, and well-explained. Outputs verified with clear screenshots.	15–17 – Most queries are correct with minor logic or output issues.	11–14 – Some queries incorrect or explanations unclear.	6–10 – Major query errors, missing screenshots or explanations.	0–5 – Very few valid queries provided or completely incorrect.
Stored Function/Procedure	15 marks	13–15 – Fully functional and relevant procedure/function with demonstration and correct output.	11–12 – Minor logic issues but overall functional and relevant.	8–10 – Partially correct, demonstration limited or incomplete.	5–7 – Incorrect or poorly designed procedure/function.	0–4 – No valid implementation provided.
Trigger Implementation	15 marks	13–15 – Fully functional trigger with correct logic and successful demonstration.	11–12 – Minor issues but functional and relevant.	8–10 – Basic trigger implemented but limited demonstration.	5–7 – Incorrect or incomplete trigger with errors.	0–4 – No valid trigger or irrelevant implementation.
Viva & Demonstration (Individual)	10 marks	9–10 – Accurately types and executes SQL queries during viva without assistance, with correct results and confident reasoning.	7–8 – Successfully types and runs most queries with minor errors or assistance.	5–6 – Can type and run basic queries but with noticeable errors or incomplete execution.	3–4 – Fails to correctly type or execute most queries, frequent syntax or logic errors.	0–2 – Cannot type or execute SQL queries during viva and unable to explain implementation.
